

Biocure Technology Inc. is a publicly traded biotechnology company developing and commercializing biosimilar pharmaceuticals and other recombinant proteins. Biocure's mission is to continue to advance the research and development of our products in the most ethical and cost-effective manner as possible.

OUR PRODUCTS

Biopharmaceuticals

Biocure started conducting pre-clinical trials of its biosimilar candidates last year, and now has multiple product studies underway, including:

- **Interferon Beta 1b** (Multiple Sclerosis treatment). **This is the company's most advanced product.** The pre-clinical trial is underway and expected to be completed by the fall of 2018.
- **PEG-Filgrastim** (Anti-cancer treatment; Pre-clinical trial stage.)
- **Ranibizumab** (Macular degeneration treatment; Pre-clinical trial stage.)

At this pre-clinical trial phase, the company has the technology and capability for commercial mass production.

CAR-T Cell Therapy (Immune-therapy for cancer)

CAR-T cell therapy is one of the most promising targeted immune-therapies and has received extensive attention which has resulted in multiple applications.

BIOCURE has established pre-clinical and clinical designs of 2nd generation CAR-T cell, standard protocol for conditioning and infusion, better control of complications and combination with other therapeutic options.

A pre-clinical study will start early in 2018 and a clinical study is expected to start in the middle of 2018.

Other Vaccines & Products

- Foot and Mouth Disease Vaccine
- Recombinant human growth factor for hair growth and skin regeneration
